

POLICY ISSUES TO BE ADDRESSED IN THE BOKARO DISTRICT

Issue/ Problem

1. Poor irrigation facility
2. Degradation of land due to mining.
3. Deforestation of forest.
4. Glut in the vegetable market particularly in tomato & cucurbits.
5. Open grazing of animal after kharif season due to problem of feed/fodder and mineral mixture.

Proposed Policy/ Inverntion

1. Proper utilization of existing water bodies such as Garga dam and Tenughat dam etc.
2. Location specific rain water management.
3. Details survey of degraded mined area and possible solution to reclamied these area.
4. Filling up open cast mined area by fly ash, city waste etc. and make it suitable for tree plantation.
5. Reclamation of degradaed land by afforestation.
6. Direction to mining industry for filling of open cast mined area after utilization.
7. Market yard facility with cool chain system should be provided in the district.
8. Opening of agri. horticulture park for providing single window system for export.
9. Fodder seed production program should be taken up in large scale to provide good fodder seed to the farmers for fodder production so that the problem of open grazing can be minimized.
10. Government should provide subsidy on animal feed and mineral mixture to boost the milk production.
11. Social forestry and joint forest management should be promoted to check the deforestation.
12. Modern cold storage facility should be provided in every block of the district.
13. Promotion of organic farming by public private partnership.
14. Ensuring quality input supply on time at subsidized rate at Panchayat level.
